

Walk Angel

A fall protection system from
Fall  Angel
PROTECTION SYSTEMS

Our Heritage

For construction and maintenance workers, working at height is an inevitable part of the job. But that's no reason to compromise: you want to know that where you work (and how) is as safe as you can possibly make it. Rooftops are always going to pose a challenge, whether they are fragile or inhospitable, they will often force you and your colleagues to take dangerous risks... and as professionals, we are sure you will want to minimise those risks.

In that light, the new Walk Angel walkway system by Fall Angel will be the perfect companion to a wide range of projects. It provides you with a level-walking surface for use

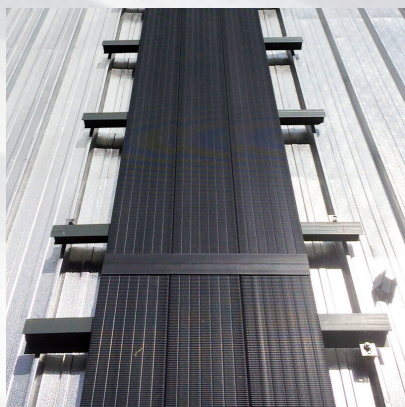

on rooftops, either flat or angled, and it is sure to provide years of use thanks to its robust, environment-conscious construction. Walk Angel conforms to the BS EN 516: 2006, DD 7995: 2003 and BS EN 1195-2-2010 standards for that added level of security.

Wherever you're working and whatever you're working on, Walk Angel will keep you on an even footing... in every sense of the phrase.

About

Walk Angel

Walk Angel walkways allow you to traverse roofs safely, maintaining the integrity of the roof. Designed to be as user friendly as possible, Walk Angel is easy to install and use. Each segment is constructed from sturdy PVC and features a flush fit joining system, as well as a non-slip surface: this ensures minimal trip risk in all weather conditions. The pieces are guaranteed not to warp, split or twist, meaning you'll have a walkway you can rely on throughout each job. It's even fire retardant: so whatever the situation, Walk Angel is sure to weather it brilliantly.

Key Benefits:

- > Lightweight for reduced transport costs and quicker handling
- > Slip resistant
- > Fire resistant
- > BBA certified
- > Boards made from 100% recycled plastic
- > Recyclable
- > Made in the UK

A Greener Choice

As well as being robustly constructed, Walk Angel is designed with the environment in mind. Every piece is made in the UK and the boards are made from 100% recycled plastic: not only does this make it easier to transport and assemble, but it minimises the product's CO₂ emissions, ensuring it is that little bit kinder to the environment. When your Walk Angel nears the end of its working life, it can be easily recycled, giving it a new lease of life later on. With the boards also being a finalist in the National Recycling Awards 2014, you can rest assured that Walk Angel will be an eco-friendly addition to your working day.
