# Weight Angel<sup>TM</sup>

**Safety should be the priority of anyone working at height, but sometimes you need a smaller problem rectifying without wanting to put an extensive and time-consuming set of safety measures in place.**

For those moments, we've created the freestanding Weight Angel post system, a fall protection solution that's simple to set up and deploy.

# Weight Angel

Weight Angel is a weight anchor designed to minimise the distance and consequences of a fall when a worker is attached to it. It is designed to be used on surfaces up to a 5 degree pitch and is simple and straightforward to use, allowing you to get the job done both quickly and safely.

A simple, straightforward safety solution without any risk of endangerment, the Freestanding Weight Angel post system is the perfect solution to a range of tasks where safety is paramount.

## Flexible & Affordable

The Freestanding Weight Angel post system consists of a set of non-penetrative weights assembled into a single, round unit. Working in conjunction with our Roof Angel post, Weight Angel creates a powerful friction anchor on the roof that is more than capable of withstanding a fall. The unit has also been specifically designed to reduce trip hazards and to occupy as small a space as possible on the roof: it's no more than 1200mm wide.

Suitable for the full range of flat roofs (up to a maximum of 5° pitch), the Weight Angel system has been tested on a range of substrates including concrete, asphalt and single ply membrane.

Its quality has also been assured by external means, and it is fully tested by **SATRA to BS EN 795:2012 class E**. With its competitive pricing and high recycled material content, it's kind to both your wallet and the environment.

### Key Features

- > **Small but substantial product: a minimal trip hazard**
- > **Easy to assemble and store when not in use**
- > **Non-penetrative: ideal for older buildings**
- > **Usable on flat roofs no steeper than a 5° pitch**
- > **Tested on a wide range of roofs and materials**
- > **Competitively priced... without any compromise in quality**
- > **Environmentally friendly**
